

OriDev, as a specialist of concrete precasting, works in cooperation with the british group Cooper & Turner, one of the world leaders of industrial fasteners.

OriDev develops new solutions for precasting and represents the Cooper&Turner group in this field.

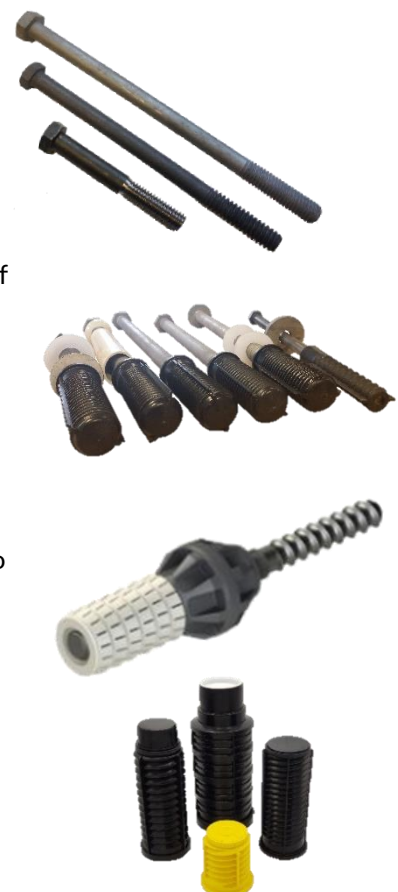

OUR EXPERTISE :

- > **Cooper & Turner Ltd** and **OriDev** have a real know-how in the field of fasteners for concrete elements.
- > Full range of bolts and connectors
- > Products adapted to the construction, rail and precast concrete markets
- > Adaptation of products to customer's needs (shear strength, pull-out strength, inclusion of the fastener into the design...)

PRODUCTS :

- > **Bolting system** : Full range of bolts and plastic sockets from M16 to M30. Length is adapted to the requirement of the customer.
- > **Alignment system** : Allow to ensure the perfect alignment of 2 concrete elements but also to ensure an important shear resistance.
- > **Dowel connectors** : ensure perfect connection between 2 concrete elements thanks to a huge shear and pull out resistance of our product.
- > **Grouting/lifting systems**: a range of products that allows to inject mortar after the installation of the concrete part but also lift the heavy concrete structure.
