

OriDev is an engineering and consulting company specialized in the development of new technical solutions for new products or industrial tooling.

From design, to the production launch of the product, through prototyping, OriDev will bring you the suitable solution.

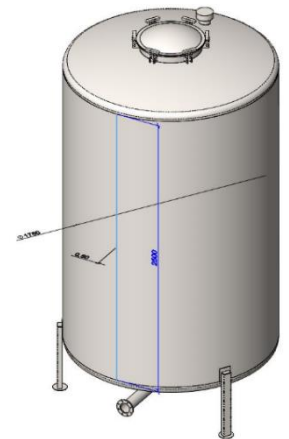

OUR EXPERTISE :

- > More than 10 years of experience in industrial tooling design.
- > The latest CAD technology (Solidworks, Autocad...) and linear static simulation.
- > 3D prototyping capability (300 x 300 x 300 mm)
- > Multidisciplinary of our designers (boiler making, machining, prototyping...)

OUR SERVICES :

- **PRE-PROJECT :**
 - > Research of technical solutions integrating all our client's requirements (technical, regulatory and budgetary)
 - > Design and sizing of the solution
 - > Estimation of projected manufacturing costs
 - > Prototype development (3D printing, laser cutting, machining...)
- **STUDIES AND METHODS :**
 - > Creation of a file of plans that can be used by the production partners
 - > Analyse and validation of the design and manufacturing
